

**Centro Interdipartimentale di Biotecnologie Molecolari  
“Guido Tarone”**

## **MBC Lectures & Seminars**

**May 15th, 2025**

**1 PM Mendel Room**

### **Uncovering novel oncogenic drivers in peripheral T cell lymphoma: from genetic alterations to therapeutic implications**

**Javier Robles Valero, PhD**

**Centro de Investigación del Cáncer (CIC) and University of Salamanca, Salamanca,  
Spain**

**Short Bio:** Javier Robles Valero is CIBERONC Investigator and Associate Professor at the Universidad de Salamanca, Spain, leading a research group focused on T-cell lymphoma. His research group has conducted studies on novel genetic alterations driving peripheral T-cell lymphoma (PTCL) initiation and progression, with a focus on RHO GTPases, TCR-associated proteins, and epigenetic regulators such as TET2.

**Host: Prof. Claudia Voena**
